Installation procedures and materials. Please discuss the following with your contractor:

- Steel lintels will be left uncovered and unsealed to allow water to shed
- All gaps will be sealed properly with appropriate high-quality materials. Preferably, gaps between wood buck and replacement window, and brick pointing and replacement window will be filled with appropriate high-quality foam sealant in accordance with manufacturer's instructions.
- High-quality caulk will be applied appropriately and in accordance with manufacturer's instructions

I confirm that I have discussed the above items with my contractor and that my contractor agrees to abide by them. _____ (Initial)
